Customer Reviews

I own several of the Quick Study Guides. They are durable and great for a quick reference or review. Since they are plastic coated and punched for a three ring binder so they are very easy to use and store. This is Part 1 and covers theory, number properties, algebraic terms, it also covers equations, inequalities, special factoring along with roots and radicals. Great for brushing up or verifying you've got it right.

I have a 14yr old that I home school and he is having trouble with Math. These charts are very detailed and self explanatory and I would encourage anyone struggling in Math to try these out. They really do help. The cost is very low and they deliver very very quickly!

Handy guide that every person who is taking Alg. I needs. Good layout and easy to use. Gets to the point and easy to find the topic students are working on. Every student who is taking Alg. I and those who are teaching it need this for a good referral when things get a bit confusing.

perfect for my kids they are in middle and high school and after the summer need a refresher before school starts this gives them the basic information they need before class starts then if they still need to refer to it while in school it is perfect

My son loves these quick study/class aids. I like that they are pre-punched and have a coating for them. My son likes them because they are very handy and he can usually find items he is looking for without having to flip through a text book.

this is required for class but is also a nice informative sheet and coated so it stays in good shape through lots of use.

Great reference. I used it for an algebra class I recently had to take for my degree. I took many higher level math classes including college calculus ages ago but because they were so old they didnt count toward my current degree pursuit. I used this as a refresher reference and it help nicely.

This was promptly received, is new, and will prove very useful in homeschooling my 9th grader in Algebra 1 in that it seems to list the basics of what needs to be covered.
